

MT: CSE <> SRE: Datadog Consolidation Overview - Tagging Query Examples

 Eric Swanson

Example service log query filtered on specific consolidation tag values as demonstrated during initial meeting with CSE to review [One Datadog World Primer](#) and solicit feedback.

```
service:semantic-layer-gateway dbt_env:prod tenant_type:mc-mt cloud_provider:azure

Toplist breakdown of  [Tags to Navigate a Consolidated Environment](#) currently populated in MT.

Also available in  [Metric Summary](#) search by tag name (and values if desired):

-  [cloud_provider](#)
-  [tenant_type](#)
-  [dbt_env](#)
-  [env](#)
 - Note that the env tag currently contains a wide variety of values unrelated to consolidation tags

log volume for services with all consolidation tags populated
